Abstract:

Al-Zaka is considered as a unique system which is legislated by Allah to be the main base for the economic and financial systems in Islam.

Al-Zaka is an important financial tool, which can be applied and used effectively in the economic and financial systems to achieve society benefits. Some of the benefits of this system; stopping the collapse in society's financial and political systems.

In addition, Al-Zaka is grate base for fiscal policy in Islam, it has been obligated by Allah to prevent store of money without utilization and encourage investment. This may limit the poverty by creating different kinds of industries. Moreover, to create job opportunities for people and reduce poverty.
